

In our small county 2 of 3 radio stations and the the only daily newspaper is owned by one man. The reporting is less than truthful and actually verges on sensationalism rather than accurate journalism. If the owner dislikes someone he does his best to attack them without justification.

To limit this type of dictatorship you must limit ownership. It is my understanding that the radio stations were bought in his father-in-laws name to bypass your laws and allow for FCC approval of his application. It worked and the media magnate is enjoying manipulation of the press....it is a travesty...can you do something about this. In the past the FCC has been highly respected....please work to stop this type of take over. We now feel that the peoples voice can only be heard on KBEL. They are very honest good people and this is what we need when they have such control over the media.

Thanks for reading this.
